The US Census Bureau reported that 96.7 percent of Provo-Orem residents own a computer, ranking the metropolitan area number two in the nation for highest computer ownership.ⁱ

U.S. Census data states that from 2013 to 2017 96.3% of Provo households have a computer. The same study found that 73.7% of households have a broadband internet subscription.ⁱⁱ

According to data found on Broadbandnow, 98.5% of Utah county residents have access to some form of internet.ⁱⁱⁱ

Broadbandnow reports that the average Provo home will find 6 providers serving a given address, or exactly 6.84 ISPs in each census block. The most common internet connection types are DSL (93.48 percent coverage) and Fiber (virtually one hundred percent coverage). Thanks largely to fiber, Internet speeds around Provo are 16.41% above the state average in Utah.^{iv}
