

THE SOUTH BEND CONNECTIVITY COALITION

In early 2022, we collaborated with key educational, civic, and nonprofit organizations in South Bend to form the South Bend Connectivity Coalition, a task force of community organizations working to ensure every resident in South Bend has equitable access to the digital infrastructure, tools, and skills necessary to thrive in the modern world.

We coordinate goals, research, and projects to bridge the digital divide in South Bend. Through regular meetings, strategic consultation, project partnerships, and best practice sharing, we strive to advance digital infrastructure, literacy, and inclusion in our community.

The City of South Bend materially supports the coalition by hosting all meetings in the City-operated Technology Resource Center, assisting with meeting coordination and organizational logistics (e.g. website maintenance), and providing refreshments for community events.

Please visit [our website](#) to learn more about our work and view the attached

list of our current members and their respective organizations.
